Safety Notes

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in injury.

Symbols

The following symbols are important for reading and understanding the operating instructions. Please take note of the symbols and their meaning. The correct interpretation of the symbols will help you to use the machine in a better and safer manner.

Operation

- The operator must use the machine in accordance with the regulations. He/she must take local conditions into account and be aware of other people, especially children, when operating the machine.
- Particular care must be taken when using the machine at height, use wrist strap provided for your convenience.
- Do not lean out of the window when using the machine.
- Never allow children, persons with physical, sensory or mental limitations or a lack of experience and/or knowledge and/or people unfamiliar with these instructions to use the machine. Local regulations may restrict the age of the operator.
- Children should be supervised to ensure that they do not play with the machine.
- The operator is responsible for persons in the working area.

Use

- Do not direct the spray from applicator against persons or animals nearby.
- Do not direct the spray from applicator against electrical devices.
- Do not insert objects into the vacuum aperture.
- If there is any possibility that the machine or detergents could harm or discolour a surface, it is recommended that compatibility be tested in an inconspicuous area before use.
- Do not use undiluted acids, acetone or solvents.
- Do not use flammable liquids.
- Do not use boiling or hot water to clean surfaces. Danger of scalding.
- Do not use hot or boiling water in the machine or spray applicator.
Do not use hot or boiling water to clean the machine.

The machine contains electrical components; do not submerge into water.

Do not touch or insert conductive objects (such as screwdrivers or similar) into the charge socket.

Do not make any changes or modifications to the machine. Unauthorised modifications can impair the safety of your machine, lead to increased noise and vibrations, and poor performance.

Charge the battery only with the supplied charger.

The appliance contains batteries that are non-replaceable.

**Safety Warnings for Battery Chargers**

Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Keep these original instructions for future reference.

Never allow children, persons with physical, sensory or mental limitations or a lack of experience and/or knowledge and/or people unfamiliar with these instructions to use the machine. Local regulations may restrict the age of the operator.

Supervise children. This will ensure that children do not play with the charger.

Keep the charger away from rain or moisture. Penetration of water in the charger increases the risk of an electric shock.

Keep the charger clean. Contamination can lead to danger of an electric shock.

Before each use check the charger and USB cable. If damage is detected, do not use the charger. Never open the charger yourself. All repairs must be performed by a Bosch Service Centre. Damaged chargers and USB cables increase the risk of an electric shock.

Do not operate the charger on flammable surfaces (e.g., paper, textiles, etc.) or surroundings. The heating of the charger during the charging process can pose a fire hazard.

Damage to the machine may cause vapours to be emitted. Ventilate the area and seek medical help in case of discomfort. The vapours can irritate the respiratory system.

**Intended Use**

The spray applicator is intended for domestic use to remove dirt from smooth, non-porous surfaces such as glass, mirrors and tiles.

The machine is intended for domestic use to vacuum liquids from smooth, non-porous surfaces such as glass, mirrors and tiles. It is not suitable for vacuuming dust!

The surfaces can be vertical, angled or horizontal. Use detergents designed for window vacuum machines; for best results, use Bosch glass detergent.

**Delivery Scope (see figure B)**

Carefully remove the machine from its packaging and check if the following parts are included:

- Window vacuum
- Cleaning head 266 mm
- Cleaning head 133 mm
- Spray applicator assembly 110 mm
- Spray applicator bottle 300 ml
- Spray applicator head 276 mm
- Microfiber cloth 276 mm
- Microfiber cloth 110 mm
- Wrist strap
- Micro USB cable
- Battery Charger**
- Original instructions

When parts are missing or damaged, please contact your dealer.

Product Features (see figures A and C)

The numbering of the components shown refers to the representation of the machine on the graphic pages.

1 Replaceable wiper blade 266 mm
2 Cleaning head 266 mm
3 Cleaning head release button
4 Battery charger level indicator
5 On/Off switch
6 Cover, micro USB port
7 Dirty water tank
8 Drain plug to empty dirty water tank
9 Spray applicator bottle
10 Trigger
11 Spray nozzle
12 Spray applicator head 110 mm
13 Spray applicator head 276 mm
14 Microfiber cloth 110 mm
15 Microfiber cloth 276 mm
16 Wrist strap interface
17 Micro USB cable
18 Charger**
19 Wrist strap
20 Micro USB port
21 Replaceable wiper blade 133 mm
22 Cleaning head 133 mm

Accessories shown or described are not part of the standard delivery scope of the product. A complete overview of accessories can be found in our accessories program.

** country specific
**Initial Operation**

- **Observe the mains voltage!** The voltage of the power source must correspond with the data on the type plate of the battery charger.

**Note:** The battery supplied is partially charged. To ensure full capacity of the battery, completely charge the battery using the charger before using your machine for the first time.

The lithium-ion battery can be charged at any time without reducing its service life. Interrupting the charging procedure does not damage the battery.

The battery is protected against deep discharging. When the battery is discharged, the machine will stop.

**Battery Charging (see figures A and C)**

- **Note:** The micro-USB port for connection of the micro-USB cable is in the handle.

When the battery charge is low, the charger level indicator flashes green.

When the charger level indicator flashes red the battery must be charged. Turn machine off and charge the battery.

Connect the machine to the charger using the micro USB cable provided. Plug the charger into the socket. The charging process begins.

During the charging procedure, the handle of the machine warms up. This is normal.

The charger level indicator continuously lights up red during the charging procedure. When the battery is fully charged, the charger level indicator continuously lights up green.

Disconnect the charger from the mains supply when charging process ends.

Observe the notes for disposal.

**Troubleshooting**

<td>Apply more force</td>
</tr>
</tbody>
</table>

**Maintenance and Cleaning (see figure J – K)**

Always clean the product thoroughly after use. Remove the cleaning head from the main body and rinse. Whilst cleaning head 2 is removed from the machine, fill the dirty water tank 7 via the cleaning head aperture to the max line with clean, warm water. DO NOT fill the dirty water tank 7 via the drain hole. Shake the machine and pour the water out via the drain plug 8.

**Maintenance of the cleaning head**

Protect the cleaning heads against damage during storage. Prevent the wiper blade from touching paper or cardboard, as this could damage the wiper blades polymer coating. Spots or lines may be visible on the polymer coating. This is normal and does not affect the cleaning performance.

**After-sales Service and Application Service**

**www.bosch-pt.com**

In all correspondence and spare parts orders, please always include the 10-digit article number given on the type plate of the garden product.

Transport

The contained lithium-ion batteries are subject to the Dangerous Goods Legislation requirements. The user can transport the batteries by road without further requirements. When being transported by third parties (e.g., air transport or forwarding agency), special requirements on packaging and labelling must be observed. For preparation of the item being shipped, consulting an expert for hazardous material is required.

Disposal

The machine, accessories and packaging should be sorted for environmentally-friendly recycling.

Do not dispose of the machine into household waste!

Only for EC countries:

According to the European Guideline 2012/19/EU, machine that are no longer usable, and according to the European Guideline 2006/66/EC, defective or used battery packs/batteries, must be collected separately and disposed of in an environmentally correct manner.

Battery packs/batteries:

► Integrated batteries may only be removed for disposal by qualified personnel. Opening the housing shell can damage or destroy the machine.

Do not dispose of battery packs/batteries into household waste, fire or water. Battery packs/batteries should, if possible, be discharged, collected, recycled or disposed of in an environmentally-friendly manner.

Subject to change without notice.
